Typography Rules

- Serif for headings only — never for body copy, captions or buttons.
- Measure: 65–75 characters per line for long-form; 45–55 in two-column layouts.
- One eyebrow per section, uppercase Inter 600 in Living Teal, followed by a 40px gold rule.
- Sentence case for all headings and buttons; ALL-CAPS reserved for eyebrows and small labels.
- Numerals: tabular figures in tables and statistics; Cormorant lining figures for large stat displays.
- Never place body text on gold, saffron or any gradient; use the paired text colour listed with each gradient.
